#### UTAH STATE TAX COMMISSION

OFFICE OF THE COMMISSIONERS STATE OFFICE BUILDING SALT LAKE CITY, UTAH 84134 801-533-5831

DAVID L. DUNCAN - CHAIRMAN DOUGLAS F. SONNTAG - VICE CHAIRMAN GEORGIA B. PETERSON - COMMISSIONER ROBERT O. BOWEN - COMMISSIONER

SCOTT M. MATHESON - GOVERNOR

Dear Governor, Legislators, and Interested Citizens:

We are pleased to present our Twenty-sixth Biennial Report (Volume I) for the fiscal year 1980-81, made in compliance with Section 59-5-46, Utah Code Annotated, 1953, as amended.

The State Tax Commission is responsible for collecting most of the state's revenues. We also supervise the administration of local property taxes which provide a significant portion of the funds for local government, as well as the State Uniform School Fund. Our role as the State Board of Equalization takes on added significance as the public increases its use of the property tax appeals process. This role will become one of manifest importance as a result of the factoring process duly ordered by the Tax Commission in December 1980. The Tax Commission did this in keeping with its constitutional and statutory mandates to assure state wide equity and uniformity.

Our report summarizes the taxes we have collected in the past year. We also wish to emphasize reorganization and the employment of automation has helped to demonstrate our concern and effort towards enhancing the cost effectiveness of the Commission and State government.

Some of the more important and interesting issues affecting the State's tax future are discussed. Additionally, we have presented a brief review of recent tax legislation, as well as a preview of recommendations for further action. As concerns about taxation and the Utah economy become greater, we are sure that this report will be a useful tool to you.

Sincerely,

Have Toteman

David L. Duncan, Chairman

Dauglas & Sonntag

Douglas F. Sonntag, Commissioner

Lobert O. Dowen

Robert O. Bowen, Commissioner

Georgia B. Peterson, Commissioner

# **REVENUE ACCOUNTING**

Floyd Tanner, *Director* Gil Naisbitt, *Asst. Director* 

The Revenue Accounting Division is responsible for depositing with the State Treasurer all tax revenue received. Tax revenue is deposited and recorded by specific tax categories so that accurate and informative reports and statistical information can be published by this division for each tax.

This division maintains subsidiary ledgers for all taxes except sales, income, withholding, and corporate taxes. These subsidiary ledgers show amounts due and payments on accounts by individual taxpayer's name.

Revenue Accounting also has specific responsibility for preparing refund vouchers; safekeeping of certain surety bonds and other negotiable instruments and securities deposited by taxpayers; maintaining control over the sale of cigarette stamps; the maintenance of a revolving fund used for change in various branch offices, payment of petty cash items, and payment of travel advances; and control over all returned checks.

The distribution, each quarter, of all local option sales tax, mass transit tax and transient room tax back to the participating localities is also a prime responsibility of the Revenue Accounting Division.

Figure A shows the level of property and excise taxation during the last 10 years. As can be clearly seen in Figure A and Table 3 (appendix), property taxes are for the most part assuming a smaller role in total revenue collections. Figure B illustrates with pie charts the greatest sources of revenue for each of the state's major funds.

# FIGURE A COMPARISON PROPERTY TAX AND EXCISE TAX COLLECTIONS

# TAXES AND COLLECTIONS BY TAX COMMISSION

# AUDITING

Don Bosch, Chief Auditor

During the past fiscal year, the auditing division activities adjustments in the amount of \$13,317,000 were necessary to correct returns filed in error. This compares to adjustments of \$13,447,000 during the previous fiscal year. Last year, the individual income tax adjustments included reductions of claims of approximately \$1,000,000 in the rebate, the error ratio was fairly high as tax payers worked with a new and unfamiliar law. The income tax deficiencies and adjustments reflect a more favorable picture when the rebate errors are considered and deducted from the prior year's amounts.

The deficiencies amount show includes \$1,300,000 recovered as a result of out of state audit trips. Our budget for out of state audit trip expenses was only \$26,000 for transportation, hotels and meals. This amount is somewhat limiting when one considers the rising costs involved with travel in this day and age. It is, obviously, an area that cannot be neglected in the future. Therefore, it is imperative that the amount budgeted for out of state audit travel be increased just to maintain our current level of coverage.

A significant increase in funds would permit

additional trips to obtain more extensive audit coverage in this large out of state taxpayer area. Our experience has shown that we are nowhere near a point of diminishing returns in this area and the cost effectiveness is evident. (The audit return is \$50.00 for each dollar of travel expense incurred.)

We are currently planning a pilot project involving an out of state branch audit office to determine the cost effectiveness of such a program. This out of state program will be carefully monitored and studied with the possibility that the program will be expanded to other cities whenever feasible.

#### **FISCAL YEAR ADJUSTMENTS:**

Corporation Franchise	
of Income Taxes	\$3,216,500
Individual Income Taxes	3,080,600
Sales and Use Taxes	5,750,100
Miscellaneous Taxes	1,269,800
Total (Including penalty	
and interest)	\$13,317,000

# **COLLECTION DIVISION**

Kent Price, Director

The Collections Division is responsible for maintaining individual accounts and billing delinquent taxpayers for thirteen different taxes. Many accounts require personal contact by telephone or by field representatives. When all other efforts have been exhausted, legal action is employed.

In an effort to increase efficiency, the division was recently reorganized into groups handling specific duties rather than having groups who specialize in the collection of certain taxes. Computerization is also being emphasized to achieve this same goal. This became necessary in order to stay within budgetary guidelines and still handle a tremendous increase in the volume of accounts due to Utah's growth in its economy and population. Computerization will minimize account maintainance allowing more employees to assume advanced collection duties. Accounts will be more current, accurate, and accessible. The delinquent taxpayer may be contacted sooner, which will reduce the number of delinquent accounts, and will alert the taxpayer to the urgency of the problem before it becomes compounded. Withholding tax was first to be computerized. Income tax accounts are now being handled by the computer and sales tax will follow shortly. As all other taxes are eventually handled in this manner and the programs are refined, an improved Collections Division will become a more effective part of the Utah State Government.

# LOCAL VALUATION

Douglas Holmberg, Director

#### **EFFECT OF 1981 LEGISLATIVE SESSION**

The 1981 Legislative session repealed Section 59-5-109, Utah Code Anotated. This action terminated the revaluation of all taxable real property in each county of the State. Local Valuation Division has been engaged in the Statewide Reappraisal Program since 1969. It had completed the initial cycle in 1978, and was started on the second cycle. The immediate effect of repeal of the revaluation statutes was the elimination of a portion of the appraisal staff and appraisal support personnel. This effectively eliminated 50 percent of the Local Valuation Division workforce.

Emphasis of Local Valuation Division following the aforementioned legislation has shifted to an audit function. The Sales/Assessment Ratio Study serves as a key tool of measurement for assessment level within each county. An equalization factor, based on this annual study, is to be applied in each county, biennially, to statistically maintain intercounty equity. The County Assessor will then be responsible for maintaining intracounty equity, as well as equity among the various major property types.

Local Valuation Division will render appraisal aid and technical assistance at the request of County Officials and as limited Division time and resources permit. Of course, existing contracts will be honored utilizing the reduced staff, before new projects are accepted. Budget and personnel restraints have limited all services to the counties, formerly performed by the Division.

Newly contracted services will be performed on a 50/50 split of costs between the State and the County. The former split was 70/30. It is felt that there will still be a significant demand for appraisal services, as time

and inflation continues to erode values.

As contracted reappraisal projects are completed, resources are being shifted to administration of the Farmland Assessment Act. Farmland classification is an integral part of the preparation for revaluation. Those counties anticipating internal revaluation, are urgently requesting farmland reclassification or review of classification.

#### ACCOMPLISHMENTS DURING FISCAL 1980-81

- Reappraisal has been completed in five counties which were under contract prior to the repeal of the Revaluation Program.
- During the last fiscal year, Local Valuation Division completed, tested and placed on line the new automated Commercial Appraisal System. This sytem rounds out the Computer Assisted Appraisal System (CAAS) which has been pioneered by the Utah State Tax Commission, and has been closely watched by assessment jurisdictions throughout the nation and in several foreign countries.
- Division Staff had designed numerous cost cutting measures dealing with computer software during the past year, which has resulted in the savings of \$300,000, while raising the quality of the end product.
- A quality sales ratio study has been completed and published during the fiscal year.
- The factoring program has been implemented as per the direction of the Legislature.
- Local Valuation has Reduced-In-Force forty-nine individuals due to the elimination of the reappraisal program.

# **ASSESSMENT LEVELS – COUNTIES OVERALL / 1980**

**FIGURE F** 

# STATE ASSESSED PROPERTY

Robert Cooper, *Director* Bob Sugino, *Asst. Director* 

The State Tax Commission annually values several categories of property which cross county and state boundaries. These properties include airlines, bus lines, car companies, gas distribution companies, pipeline companies, power companies, railroad companies, terminal companies, water companies, mining companies and oil and gas companies. Assessment rolls are preapred and delivered annually to the county auditors in the counties where the properties are located. The valuation notices are prepared from appraisals made by the Tax Commission and from personal property and production returns filed by the companies.

Tax Commission appraisers periodically visit these properties to update appraisals. As well as making appraisals of buildings and improvements, the Tax Commission has an on-going audit program. All auditors are certified appraisers and are able to make appraisals at the time the audit is made.

Cities, towns and special taxing districts are responsible for reporting all annexations to the Tax Commission. Current boundaries are necessary in apportioning values of state-assessed properties among taxing units. Counties must report the mill levy of each taxing unit to the state to be reviewed for compliance with statute.

Table 8 (appendix) represents the total assessed

value for all properties in 1979 and 1980. Assessed values state-wide increased 6.90% to \$5,602,368,715. Total taxes rose 11.12% as shown on Table 8 (appendix). The largest percentage increase in locally-assessed properties was for commercial and industrial machinery (18.29%). The largest percentage increase in state-assessed properties was airlines (23.75%) and non-metalliferous mining companies (15.07%).

Figure H graphs the percentage of assessed value attributable to each class of property. There was little fluctuation between 1979 and 1980 in the distribution of assessed value for the different classes of property despite the percentage of assessment for state-assessed property decreasing from 21% to 20%. Figure I shows the distribution of property tax dollars in 1980. Table 9 (appendix) compares the distribution of property taxes according to purpose for 1979 and 1980.

Property taxes from all classes of property from 1971 to 1980 increased 126% from \$167,880,362 to \$379,364,390 (Figure G). Assessed value of all properties increased from \$1,966,036,794 to \$5,602,368,715 or 184%. In Figure J, the growth of state-assessed properties has not kept up with locally-assessed properties. This is partially due to the lowering of the assessment level from 26.5% (1971) to 20% (1980).

# TOTAL PROPERTY TAXES CHARGED ON ALL PROPERTY

# ASSESSED VALUE OF ALL CLASSES OF PROPERTY FOR 1980

# FIGURE J

Total Property Taxes Charged (÷ 10)

Total Assessed Valuation

Assessed by County Assessor

# PERSONAL PROPERTY

Robert Strigham, Director

The operations of the Personal Property Division may be divided into three areas: Auditing, Assessment Standards, and Centralized Valuation.

The Auditing Program is designed to review 20 percent of the personal property accounts each year in each of the twenty-nine counties. In addition to the routine auditing, we frequently work with the county assessors on the problems that our experience and expertise can help resolve.

The division promulgates assessment standards so that the quality and equity of assessments will be maintained or improved. Recommended value loss schedules, a farm machinery guide, and aircraft guide, motor vehicle, boat, and other guides are published yearly to aid the county assessor in the valuation of personal property. We are very much interested in involving the assessors in the formulation of the various schedules and recommendations so that what is provided will be useful.

Items of personal property such as cars, light-duty trucks, machinery dealers rental inventory, and truck campers are centrally assessed. This reduces the number of returns required of taxpayers and allows the use of labor saving computers.

Current legislation which could affect personal property includes House Bill Number 164 passed by the 1981 Legislative Session. Should the decision be made that House Bill Number 164 applies to personal property the estimated loss in local revenue would exceed \$500,000,000.

Counties are billed 30 percent of the cost of the Audit Program. The following bar graph shows a breakdown of the counties of ratio of increase in tax dollars billed to cost, i.e. 5:1, 20:1, etcetera.

FIGURE L

**Fiscal Year** 

# **TOTAL ASSESSED VALUE OF PERSONAL PROPERTY**

# **MOTOR VEHICLE**

Ronald Poselli, Director Edward Berry, Assistant Director

#### ACCOMPLISHMENTS:

The activities of the Motor Vehicle Division during FY 1980-1981 resulted in a wide range of accomplishments and innovations. Examples of our achievements and improvements are:

- The complete automation of title issuance procedures. Currently, 1,500 to 2,000 titles are entered each day.
- The sophisticated new Horizon telephone system has vastly improved all telephone communication with the M.V. office. An operator, to acknowledge calls within sixty seconds and direct them to the correct department, coupled with informed, well trained telephone personnel is providing Utah citizens a timesaving, valuable service.
- The approval of documents and the collection of fees have been combined into a single transaction, thus cutting the customers "waiting in line" time. This innovation, plus a new window for dealers and one for renewals have added greatly to customer service and the proficiency of our organization.
- Branch offices are being reorganized and personnel are receiving special training at the Fairgrounds office. Increased productivity, a greater understanding of the computer system and its capabilities, and the ability to complete more transactions in the branches, are goals toward which we are working.
- A redesigned data entry system with new hardware, has significantly enhanced our computer capabilities. This new system has made it possible to eliminate the edit list and put within reacy a ten day time limit on title insurance.
- Utah has completed bilateral agreements (mini IRP) with the states of California and Pennsylvania, and a reciprocity agreement with the state of New Jersey. As Utah is a charter member of the International Registration Plan (IRP), a Utah based motor carrier may now become registered (apportioned) in 29 states by submitting an application in Utah and paying with a single check to cover fees for all states. This gives them a single cab card and a single plate qualifying them to operate in all 29 states. The prorate section is now computerized, automating fee calculations and cab card printing. Recently Uniform Prorate for an additional 15 states has been added to the computer program.

- The Motor Vehicle Registration Laws and Regulations was revised, updated and indexed, making it easier for everyone to use. The 1981 supplement has been added.
- New electronic cash registers not only record revenues, but also list each type of vehicle registered and give a daily audit of decals issued.
- Seven registration forms have been replaced by one combined application, to reduce errors and save valuable employee time.

#### **PROJECTIONS:**

We anticipate many positive accomplishments during fiscal year 1981-1982. Some of our objectives are:

- To correct problems in the mail renewal program to help insure delivery of these valuable expiration reminders to all vehicle owners.
- To automate license plate and stock supply inventory and data concerning impounded vehicles and personalized plates.
- The implementation of a word processing system to assure a prompt response to all written inquiries coming to Motor Vehicle.
- An educational program to upgrade the capabilities of all employees will be an on going process.
- The development of a sophisticated accounting system using, to the greatest advantage, information recorded by electronic cash registers.
- To acquire either mini IRP agreements or reciprocity agreements with as many of the states as possible to further enhance the value of the Utah base plate.
- To eliminate or combine forms whenever possible to reduce office work and expenses and to improve public convenience.
- To upgrade the salaries of employees to improve morale and stop the loss of well trained, valuable personnel to private industry.

# SUMMARY OF TRANSACTIONS FOR FY 1980-1981

Documents Issued:

Duplicate Titles and	
Duplicate Registrations	102,278
Certificates of Title	335,299
M.V. Registrations	1,343,299
Revenues collected from all Motor Vehicle	
Transactions\$28,2	206,921.46

# **MOTOR VEHICLE BUSINESS ADMINISTRATION**

#### John Burt, *Director* Dale Brown, *Assistant Director*

The Motor Vehicle Business Administration is responsible for licensing and regulating all persons, firms, and corporations involved in manufacturing, dismantling for salvage, selling, or distributing motor vehicles which are subject to registration under the Motor Vehicle Act.

This Division works closely with law enforcement agencies and county attorneys to enforce the Motor Vehicle laws. Investigative activities include: inspections of places of business, peace officer inspections, impounded vehicle identification numbers (VIN) verifications, impounded vehicle sales, consumer complaints, auto theft and fraud. Permits issued include: in-transit, temporary, junk and dismantling. Special plates (dealer, dismantler, transporter, and manufacturer) are also issued through this office.

The national economic situation continues to have a tremendous impact on the motor vehicle industry. High interest rates are greatly affecting many of the Utah dealers who have large inventories. Turnover is continuing at a higher than normal pace. The ratio this past year indicates a few more dealers going into business than have gone out of business. The total number of licensed has slightly increased by 1.48%.

Overall motor vehicle sales are down again this year, indicated by about an 8% decrease in temporary permits issued.

The 1981 Legislature provided for a fee increase in most of the license classifications, effective May 12, 1981. Hopefully, this will bring our collections closer to funding the division's operation. In past years, this division has been completely funded by revenue from the industry.

The application and license forms have been revised to a multiple form and is proving very successful. This should also effect a cost savings.

#### FIGURE N

#### **INSPECTIONS**

#### TEMPORARY PERMITS & SPECIAL PLATES

#### **INVESTIGATIONS**

During the past two years, the Utah State Tax Commission has been implementing several improvements to administrative procedures, operating systems, and accounting control while concurrently developing a comprehensive Tax Management System (TMS) design for long term improvements. The development and implementation of these improvements are the result of efforts by the System Development Group.

With the aid of the accounting firm of Deloitte, Haskins and Sells, the detail design of the TMS has recently been completed. The detail desing describes the overall system and each of the subsystems for data entry, transaction processing, batch file processing, and on-line processing. The detail design document is the culmination of more than three years of research by the System Development Group and Deloitte, Hanskins and Sells.

In the coming months the System Development Group will begin the initial modules involved in the implementation of the TMS. One of these modules is the selection of equipment to create an automated cashiering function which will streamline the accounting of incoming state revenues. Another module will include interfacing with the statewide data base management system. The State of Utah has acquired the ADABAS date base management system from Software AG for use by those agencies using the

Utah has been a member of the Multistate Tax Commission for the past 12 years. MTC membership offers states significant economics of resources and other advantages for the complexities of auditing large interstate and multinational business organizations. In connection therewith, the MTC has also provided considerable impetus toward accomplishment of "full accountability" of large corporations to the various states. This achievement provides significant benefits to individual state tax administration programs. It is imperative that states have knowledge of business activities of companies in each state in order to insure accurate tax amounts be remitted each state involved.

In 1977, Utah began participating in the MTC joint audit program. The benefits of this program to Utah over the past four years includes an increase in franchise tax deficiencies of over 2.2 million dollars for the expenditure of approximately \$140,000 (a better than 15 to 1 return ratio). Future benefits could provide monetary benefits of greater magnitude provided the states give the MTC sufficient funding and support to allow the MTC to operate and expand this valuable program.

The MTC has provided effective leadership in the

Barry Conover, Systems Analyst

central data processing facility. The TMS makes extensive use of a data base which contains all pertinent information available to the Tax Commission necessary to administer taxes and process returns. The data base itself is comprised of several interrelated files. The System Development Group will initially be concerned with one data base file: the Criteria File. The information in the Criteria File is extensive and contains reference and control parameters necessary to insure correct system operatioln. Individual computer programs must access the control information, or the Criteria file, in order to process transactions correctly.

TMS is more than a computer program, however, it is a reorganizaton of responsibility affecting virtually every facet of Commission work. That is why another project of the System Development Group in the coming months will be the reorganization of the various revenue administration divisions along functional lines to facilitate the more efficient implementation of TMS.

The growing concern over tax and expenditure limitation has emphasized the necessity that the revenue producing arm of the State be properly equipped to collect the correct and legal amount of tax monies. Thus, the need for internal control, improved records, greater access, and speedier handling has become indisputable.

### **MULTISTATE TAX COMMISSION**

challenging fight to establish the credibility and acceptance of the "unitary business concept". In the important area of state taxation, utilization of this concept in auditing insures that business organizations composed of various corporations cannot gain unfair tax advantages over business organizations made up of many divisions.

Even though MTC has finally been accepted, there still remains the practical enforcement of the favorable court decisions rendered with regard to corporate compliance. The MTC must have appropriate and workable access to corporate records. The fight to protect the MTC has demonstrated what the MTC can accomplish, but also has illustrated how very essential and critical interstate cooperation has become in these matters.

The MTC has also been actively engaged in promoting "uniformity" among the states, and working toward a means of providing "uniform reporting" for all companies. These endeavors deserve full support by the state and business community.

Utah has long recognized the value MTC offers toward achieving tax equity and effective tax compliance goals.

# **GOVERNOR'S POLICY SPEECH CALLING FOR AN INCREASE IN SEVERANCE TAX**

#### (The following are excerpts from Governor Scott M. Matheson's speech, April 7, 1981, before the third annual Utah Taxes Now Seminar.)

National energy policy continues its focus on the western states. Utah's oil shale, tar sands, coal, oil and gas, are all targeted by Washington for large-scale energy development. Our State Planning Office believes that 70 percent of the projected population growth in the next 20 years will be directly or indirectly attributable to energy projects. This growth and development of our resources is not primarily for Utah's own needs, but to meet national energy needs and goals.

I think we have to recognize that projected growth will have an enormous impact on Utah's communities, including escalating needs for housing, water and sewer systems, transportation systems, hospitals, public safety services, and schools. We also know that there is an effort to cutback many of the specific federal programs which support impacted areas. Thus, it is going to be up to the state and local governments, largely to provide these impact needs.

I felt that it was essential that the legislature address, during the last session, the issue of a state severance tax policy as part of a total growth management for the depletion of its mineral resources. Unfortunately, the Legislature insisted on addressing the severance tax issue as a budget issue and dismissed it as a simple tax increase. This is inaccurate and shortsighted.

Several of the task forces in the recent statewide planning effort in the Agenda for the Eighties recommended a state uniform policy on severance taxes. The consensus of this public citizen group was that a severance tax should be applied across the full spectrum of mineral and energy development in the state. They suggested that new revenues should be used to mitigate the socio-economic and environmental effects of cyclical energy development, to create a heritage fund for the future, and to develop a more equal sharing of the tax burden among the different extractive industries.

In considering a severance tax, it is necessary to dispel two myths that are commonly argued by the industry and others who oppose a comprehensive severance tax policy. The first myth is that new severance taxes on coal and increased levels on oil, gas, and metals will detract from Utah's competitive posture. This is simply not true.

In the case of oil and gas, for example, the overthrust belt in northeast Utah and southwest Wyoming is one of the hottest oil and gas properties in the country. We expect continued exploration and production from this region and comparisons of states show that both Colorado and Wyoming have a 4 percent severance tax on oil and gas. Senator Farley's Senate Bill 250 suggested increasing the severance tax on oil and gas from 2 to 4 percent. An amended version provided a graduated tax up to 5 percent, with the larger percents hitting the high producers. I believe the effect on the increased tax on these producers will be negligible. In the case of oil, producers may take the state severance tax as a deduction against both their federal income tax and the windfall profit tax. Studies by the Utah State Tax Commission indicate producers will experience only about 30 percent of this increase in actual costs to the producers.

A second myth associated with the prospect of imposing a severance tax is that Utah citizens will bear the brunt of severance taxes and significantly higher energy costs. The most commonly cited example is coal. However, the University of Utah and the Utah Energy Office have compiled data which indicate 60 to 65 percent of a coal severance tax would be exported directly to indirectly as a component in the production of other products like steel, copper, and electricity.

Analysis by the Utah Energy Office show the impact of a 2 percent coal severance tax on electric rates to be negligible, adding only 9 cents to the average residential monthly bill and 67 cents to the average commercial customer's monthly bill. The magnitude of projects like Intermountain Power Project and synthetic rural plants planned for the Uintah Basin, coupled with excellent export possibilities to the Far East, suggests that the vast majority of Utah's severance tax will be exported outside the state.

Utah is at a crossroads. We are the fifth fastest growing state in the nation and our numbers swelled 37 percent during the decade of the 1970's. Our birthrate is twice the national average and we have an insufficient number of classrooms to house a burgeoning schoolage population. Potential impacts of energy development on our communities, our environment, and quality of life are, in a word, staggering. My desire to provide the state of Utah with the mechanisms and resources necessary to successfully meet the challenges of the 80's dominated the budget concepts that I presented to the Legislature last January. The defeat of the severance tax proposal may have fulfilled legislative campaign promises to avoid new taxes, but I agree with the Deseret News Editorial of March 6 which said, 'That philosophy will be cold comfort to future generations."

#### Changes in the Income Tax Laws

House Bill 168 — This measure equalizes the individual income tax rates for single and married individuals who file separate tax returns. It is expected to increase revenues by \$3.7 million a year.

Senate Bill 274 — This bill altered the treatment of individually held pension distributions to conform with IRS rulings. Distributions are now to be treated as long term capital gains rather than as ordinary income.

#### **Insurance Premium Tax**

House Bill 226 — The payment of insurance premium tax is changed from being paid yearly to quarterly. This will result in a one-time increase of 4 million dollars to the general fund.

#### Change in the Sales Tax Law

House Bill 228 — This bill was vetoed by Governor Matheson. It would have altered the distribution of sales tax, allowing 10 percent of the tax to be distributed on a per capita basis rather than on a point of sales basis.

#### Motor Fuel Tax

Senate Bill 98 — This bill raised the tax on motor fuel by 2¢ per gallon. An increase in 14 million dollars is expected.

#### Property Tax Laws

House Bill 196 — This measure passed without the Governor's signature. It repealed the state's reappraisal program while retaining the ability to assist counties with their reappraisals.

House Bill 164 — This bill mitigates the shift of property taxes on residences caused by the factoring and by the method of assessing which allows no deductions from

gross replacement cost in establishing value.

Senate bill 170 — This bill deals with property tax prepayment and impact development. It eliminates the prepaid sales tax but allows local governments to authorize developers to prepay ad valorem property taxes under certain specified conditions. It also requires of all major developers a financial impact statement prior to commencement of construction.

Senate Bill 185 — Senate Bill 185 provides that property which is exempt from property taxes (as in the case with I.P.P.) but pays in lieu fees will be included in debt limitation calculation as tax equivalent properties.

Measures proposed by Representative Pace that would have replaced the school levy of 24 mills with an increase of local sales tax were defeated.

#### Additional Issues

Senate Bill 303 — This bill repeals the homeowners' and renters' tax credit.

Senate Bill 250 — This bill, proposed by Senator Farley, failed to gain support in the House of Representatives. It would have imposed a severance tax upon oil, gas, coal, and nonmetallics.

Measures to increase the fees for vehicle registration and driver's license, failed (both proposed by Senator Sandberg.)

Measures proposed by Representative Brockbank which would have limited state and local governmental expenditures, failed.

#### May 5th, Override Session

There were no tax issues dealt with in this first time override session.

# THIRD ANNUAL UTAH TAXES NOW SEMINAR

Over 300 people attended this year's seminar, representing virtually every economic segment and geographic area of the state.

Governor Scott Matheson delivered an excellent keynote address for the conference in which he clearly and emphatically underscored the need for increased severance taxes to be guided by a broad and comprehensive severance tax policy (see summary below).

The major activity of the day was taken up with a lively discussion of factoring; repeal of the state reappraisal program (H.B. 196); 106% levy rollback requirement (H.B. 104); 20% cut in residential assessments (H.B. 164); and the impact of all of these on the school finance law. Panelists were Representative Franklin W. Knowlton; David Duncan, Chairman, Utah State Tax Commission; Jack Olson, Utah Taxpayers Association; Harrison Conover, Utah County Assessor; Arthur Bishop, Utah State Office of Education; and was moderated by Commissioner Robert O. Bowen. Audience participation was widespread and extremely active. When the dust finally settled, it became clear that the 20% reduction called for in H.B. 164, would have to pertain to all locally assessed commercial property as well as residential.

Other topics dealth with during the day were: motor fuel tax increase, the new property tax calendar, the mill levy formula, the sales tax redistribution, and the changes in funding of public education.

They likewise generated similar audience participation. The general reaction was that the seminar had once again served a very useful purpose in relating to the general public the impact of legislative action regarding taxes in Utah.

House Speaker, Norman Bangerter, concluded the day with well-stated and appropriate comments, that by and large the legislature was responsive in enacting essentially what the people wanted and what the state needed regarding taxes.

# **TAX REVISION COMMITTEE RECOMMENDATIONS**

The Governor's Tax Revision Study Committee completed its report for 1980 and submitted its recommendations to Governor Matheson. David L. Duncan, chairman of the State Tax Commission, serves as chairman of this committee.

The committee concentrated its studies on four major areas: School Finance Funding, Transportations Funding, Fiscal Alternatives to the Removal of Sales Tax on Food, and County Government Tax Problems. The committee's recommendations follow:

#### **School Finance Funding**

The committee recommended that:

- 1. The property tax continue to be utilized as a primary funding source for operation of the public schools in Utah, thus assuring a balanced state tax system.
- 2. Equity and uniformity in property assessment ratios be achieved by instituting a real estate transfer act which would provide more reliable data on the actual fair market value of real property, combined with an update of current legislation (Utah Code Annoted, 59-9-2) to allow the State Tax Commission, by utilizing such data, to assure equal assessment throughout the state.
- 3. The State Board of Education be urged to develop a detailed plan for year-round school operation and present such a plan to local school districts with the strong recommendation that the concept be put into effect. The year-round school plan now in operation in Jefferson City, Colorado is suggested as a model.
- 4. Greater effort be made to share school buildings across district lines and to utilize other community resources (our educational institutions, private facilities, etc.) for conducting public school programs.
- 5. The State Board of Education be urged to take a stronger, more affirmative hand in stimulating the construction of energy efficient school buildings and the use of central code mudular building plans.
- 6. The full resources of the state be utilized for school construction by the development of a formula for

statewide equalization of capital outlay funding similar to the current maintenance and operating funding.

#### **Transportation Funding**

The committee recommended that:

- 1. Motor and diesel fuels should be taxed on an ad valorem rather than on a unit basis.
- The Executive and Legislative branches should utilize alternative funds rather than Transportation Funds to function agencies which do not directly maintain or construct highway facilities or which do not assist in collecting transportation funds.
- 3. The committee recommended a \$5.00 motor vehicle registration fee increase for every motor vehicle.
- 4. The committee recommended that driver's fees cover the cost of administration.

The last two recommendations were considered during the 1981 Legislature, and both failed to be enacted into law.

#### **Alternatives to Food Tax Removal**

In the election of 1980, the people of Utah defeated an initiative to remove the Sales Tax on Food. The committe's recommendations dealt with the implementation of the law. The committee went on record opposing the passage of COST-OFF.

#### **County Government Tax Problems**

The committee recommended that:

- 1. The committed recommends a bidding procedure based on the increase in dollar value as opposed to the decrease in the size of the property up for the final tax sale.
- 2. The committee goes on record as supporting the counties be exempt from the ceiling on the rates on tax anticipation notes.

The 1981 Tax revision Study Committee is studying the assessment policies, regulations, and practices of state assessed property. The report from the 1981 committee is scheduled for completion by January 1982.

# ANALYSIS OF PRESIDENT REAGAN'S TAX CUT PLANON THE STATE OF UTAH DURING CALENDAR YEAR 1982

#### **OVERALL IMPACT**

The President's tax cut program as defined in part by The Economic Recovery Act of 1981 and his budget will impact the State of Utah tremendously. While state officials preliminarily estimate calendar year 1982 budget cuts will lower federal grants to the State and its political subdivisions by \$40 million to \$50 million, Utah taxpayers overall should experience net benefits from the combined individual and business tax income tax cuts, even if the Utah Legislature is forced to raise its taxes to meet federal grant cuts.

Based on our assumption that Utah personal income will grow 11 percent per year from 1980 to 1982, federal individual income taxes will decline by over \$214.5 million in 1982, down 13.7 percent. See Table 1, below. Federal corporate income taxes will drop \$35.3 million or 8.3 percent in 1982. Since the lower federal individual income taxes are deductible from state taxable income, state taxable income will increase somewhat on individual returns due to the Reagan program. At this point, it appears that the state income tax will increase \$4,670,000 in calendar year 1982 because of the federal tax cut. Corporations will pay about \$3.9 million less in state corporate taxes due to the Reagan proposal to adopt the "Accelerated Cost Recovery System" (ACRS) which will accelerate depreciation on newly purchased plant and equipment. The initial impact of ACRS in 1982 is relatively small compared to the 27 percent decrease in state corporate tax revenues forecast by 1986.

# Table 1: Impact of President Reagan's Budget andExpenditure Program on Utah Calendar Year 1982(In Million Dollars)

	Under Current Law	Under Reagan Plan	Difference
Federal Revenues from Utahns			
Individuals	\$1,566.6	\$1,352.1	\$-214.5
Corporations	425.0	389.9	-35.3
State Government Receipts			
Individuals	345.9	350.6	4.7
Corporations	46.8	42.9	-3.9*
Federal Grants to State and Local Government	,		
Non-Defense	600.0	550.0	-50.0
*Cuts will run four times larger by 1 Tax Cuts Section.	986, due to A	CRS. See	Business

By Douglas Macdonald, Tax Economist

Under normal conditions, one could add about nine percent to the individual income tax receipts estimated in Table 1 to arrive at at state fiscal year receipts. However, changes to federal and state withholding rates could significantly alter that calendar year to fiscal year pattern. Presently, the state tends to overwithhold; its withholding tax rate equals 26 percent of federal withholdings. One option, at least during 1981 and 1982, is to leave the present rate intact, thereby mitigating the tendency for the state to overwithhold ( $350.6 \div 1352.1 + .259$ ).

#### INDIVIDUAL TAX CUTS

The difference between the current law tax rates and the Reagan plan is most pronounced in the over \$100,000 bracket. Under the current law, the average couple filing a married-joint return earning over \$100,000 paid 38.54 percent of their (adjusted gross) income to the federal government. The same taxpayers will pay an effective rate of 32.32 percent of adjusted income in federal income taxes.

On the average, married-joint taxpayers earning less than \$10,000 will receive about a 19 percent federal tax reduction. Married-joint taxpayers earning between \$10,000 and \$20,000 will receive between a 15.2% to 16.4% tax cut. Taxpayers between \$20,000 and \$100,000 will receive 12% to 15% tax cuts. Those taxpayers earning over \$100,000 will pay 16.1 percent less in federal taxes. The percent reduction for taxpayers who file a married-joint return is basically very proporational, except on the low and high extremes.

At the high end, a taxpayer earning \$163,558 in 1982 would normally pay \$63,041 to the federal government. He would pay only \$52,865 under the Reagan plan — a savings of \$10,176 or 16.1 percent tax break. proportion of that \$10,176 federal tax reduction will be saved or invested by the well-to-do taxpayer.

On the other hand, those taxpayers earning between \$20,000 and \$99,999 will average between \$337 and \$1,796 in federal tax cuts. *These taxpayers will receive 60 percent or \$128 million of the federal income tax cut.* Given the continued pressures on family budgets, it is likely that a substantial portion of the \$128 million, perhaps 50 percent, will be spent on consumer goods (boosting state sales taxes) rather than invested as the President's advisors have speculated.

**NOTES:** West Valley City Adpoted the Local Option Tax effective July 1, 1980. East Layton City disincorporated June 12, 1981 and was annexed by Layton City.

Farr West City adopted the Local Option Tax effective January 1, 1981.

Harrisville, Huntsville, North Ogden, Ogden, Plain City, Roy, Pleasant View, South Ogden, Uintah, and Washington Terrace all adopted the local option tax effective July 1, 1979. Due to accounting periods, only three quarters are represented in the above amounts for each of these localities for the period July 1, 1979 to June 30, 1980.

Local Sales & Use Tax is ¾ of 1 percent of net taxable sales or purchases. Presently, the rate is uniform statewide. The revenues are distributed back to the town, city or county in which the sale took place (depending on whether the local option ordinance has been adopted.)

#### TABLE 5

Unitah County	4-1-72	24,453.78	53,748.42	29,294.64	119.80
Utah County	7-1-71	105,629.00	119,023.97	13,394.97	12.68
Wasatch County	4-1-71	22,843.02	23,152.17	309.15	1.35
Washington County	4-1-72	70,171.64	90,146.29	19,974.65	28.47
Wayne County	1-1-73	4,107.46	5,512.85	1,405.39	34.22
Weber County	1-1-70	82,175.64	118,695.08	36,519.44	44.44
Grand Total		\$2,314,929.69	\$2,614,758.89	\$299,829.20	12.95

#### NOTES:

1. Piute, Sanpete, and Wayne Counties increased their rate from 2% to 3% effective July 1, 1980.

2. Duchesne, Millard, and Uintah Counties increased their rate from 11/2% to 3% effective July 1, 1980.

3. Daggett County increased its rate from 11/2% to 3% effective October 1, 1980.

4. Carbon County increased its rate from 1h% to 3% effective January 1, 1981.

5. As this is a county tax, all distributions are made to the counties only. All 29 counties have adopted this tax. It applies to the rental charge for any suite, room, or rooms in a motel, hotel, motel court, inn or similar public accommodation for fewer than 30 consecutive days. This tax is over and above the applicable sales tax. Room tax is remitted on a quarterly return separate from sales tax.

6. The room tax rates as of 6-30-81 are 11/2% in Beaver, Cache, Emery, Garfield, Iron, Juab, Kane, Rich, San Juan, Tooele, and Washington Counties; 2% in Seview County; 21/2% in Grand County; and 3% in all other counties.

# TABLE 6

#### SUMMARY OF DISTRIBUTION OF LOCAL TRANSIT AUTHORITY TAX TO PARTICIPATING UNITS FOR FISCAL YEARS 1970-80 AND 1980-81

	NET DISTE AFTER ADN		AMOUNT OF	PERCENT OF
UNIT	7-1-79 to 6-30-80	7-1-80 to 6-30-81	(DECREASE)	(DECREASE)
Davis County	\$1,267,756.44	\$1,370,813.05	\$103,056.61	8.13
Salt Lake County	10,670,508.37	11,240,705.69	570,197.32	5.34
Weber County	1,933,456.78	1,932,621.06	(835.72)	(.04)
Park City	121,170.39	150,847.30	29,676.91	24.49
GRAND TOTALS	\$13,992,891.98	\$14,694,987.10	\$702,095.12	5.02

#### NOTE:

This tax can be adopted by a county or municipality after proper procedures are followed including voter acceptance. The rate is ¼ of 1 percent of net taxable sales and is remitted on the regular quarterly sales tax return. At present only three counties; Salt Lake, Davis and Weber and one city, Park City, have adopted this tax. In the case of Salt Lake, Davis, and Weber Counties, the distribution is made by the Tax Commission direct to the county which in turn distributes the money to the Utah Transit Authority.

Applicable to:	Owner or operator.		
Disposition of Revenue:	Transportation fund.		
Citations:	Sections 41-1-1 to 41-1-141, U.C.A., 1953.		

#### NINETY-SIX HOUR TEMPORARY PERMITS

Rate of Tax:	\$5.00 for single units and \$10.00 for multiple units.
Applicable to:	Qualified nonresident commercial motor vehicle operators in lieu of annual registration.
Disposition of Revenue:	Transportation fund.
Citations:	Sections 41-1-88, U.C.A., 1953.

#### SALES TAX

ġ

Rate of Tax:	Four percent of retail sales and rentals of tangible personal property; 4% of retail sales of meals, admissions to places of amusement, intrastate communication and passenger service, electric, gas and heat utility service, hotel and motel accommodations and certain other services; extensive exemption provisions, retailer license issued without fee.		
Applicable to:	Retail sale of tangible personal property and services listed above. Vendor collects the tax except that purchaser of a motor vehicle from a person other than a licensed dealer is liable for the payment of the tax at the time of registrations.		
Disposition of Revenue:	State general fund.		
Citations:	Sections 59-15-1 through 59-15-22, U.C.A., 1953.		
SCHOOL LUNCH TAX			
Rate of Tax:	Eight percent of retail sales price of wines and distilled liquors sold by liquor control commission.		
Applicable to:	Sales of wines and liquors. Collected at time of sale.		
Disposition of Revenue:	Uniform school fund to be apportioned to local board of education for school lunches.		
Citations:	Sections 53-8-1 through 53-8-5, U.C.A., 1953.		
SPECIAL FUEL TAX			
Rate of Tax:	Nine cents per gallon for fuel (other than gasoline) used in propelling motor vehicles upon highways in Utah; governmental exemption; 4 cents per gallon for aircraft fuel.		
Applicable to:	Sale or use of special (diesel) fuel. Dealers required to collect tax on fuel placed in service tanks of motor vehicles. Returns are required of all users and user-dealers.		
Disposition of Revenue:	Transportation fund.		
Citations:	Sections 41-11-49 through 41-11-76, U.C.A., 1953.		

#### TRANSIENT ROOM TAX

Rate of Tax:	Up to 3% as fixed by county ordinance, of defined accommodation charges; Tax Commission acts as agent for counties.
Applicable to:	Persons doing business as motor courts, motels and hotels.
Disposition of Revenue:	Counties which impose this tax to establish, promote and finance recreational tourist and convention promotion bureaus.
Citations:	Section 17-31-7, U.C.A., 1953.
	As enacted by Chapter 35, Laws of Utah, 1965.
USE TAX	
Rate of Tax:	Four percent of amount paid for tangible personal property purchased for use, consumption or storage in Utah; includes rentals in lieu of purchase and services of repair, renovation and certain installations of tangible personal property.
Applicable to:	Transaction indicated above. Licensed vendors liable for collection of tax; purchasers liable if not taxed by vendor.
Disposition of Revenue:	State general fund.
Citations:	Sections 59-16-1 through 59-16-25, U.C.A., 1953.
	As amemded by Chapter 163, Laws of Utah, 1967; Chapter 14, First Special Session, Laws of Utah, 1969. Effective July 1, 1969.

## ERRATUM

We would like to bring to your attention a typesetting error in Table 8, page 36. Please make note of the transposition of the two headings which read: **Assessed Value** and **Property Taxes.** The first four columns of Table 8 relate to **property taxes** rather than the assessed value, and the last four columns relate to **assessed value** rather than property taxes.
